

ACRYLIC SEALER

KEY RESIN COMPANY

Key Resin #805 Acrylic Sealer is designed to provide a UV resistant finish for Key Pool Deck Systems or as a sealer for exterior concrete patios, decks and sidewalks.

COLORS

Before selecting, carefully consider that light colors tend to show more 'shadow' than darker colors. This also applies to wheel marks and dirt, which naturally show up more on light vs. dark colors.

TRAFFIC

Consider the type of traffic your floor will endure. Think about what might be most commonly spilled on your floor? What degree of chemical resistance may be required?

Consult your local Key Resin Representative or the main office to answer these questions and more.

Key Resin Company provides this color guide for preliminary color selection only. Please refer to a physical sample prior to making a final selection.
